CHIROPRACTIC & ACPUNCTURE INFORMED CONSENT

CHINOI MACTIC & ACI ONCTONE IN ONIVIED CONSENT
PATIENT NAME:
TO THE PATIENT: Please read this entire document prior to signing it. It is important that you understand the information contained in this document. Please ask questions before you sign if there is anything that is unclear.
THE NATURE OF THE CHIROPRACTIC ADJUSTMENT The primary treatment used by doctors of chiropractic is spinal manipulative therapy. I will use that procedure to treat you. I may use my hands or a mechanical instrument upon your body in such a way as to move your joints. That may cause an audible "pop" or "click," much as you have experienced when you "crack" your knuckles. You may feel a sense of movement.
ANALYSIS/EXAMINATION/TREATMENT As a part of the analysis, examination and treatment, you are consenting to the following procedures: Initial each procedure you are consenting to.
Chiropractic: Including but not limited to spinal manipulative therapy, palpation, vital signs, range of motion testing,
orthopedic testing, basic neurological testing, muscle strength testing, postural analysis testing, and radiographic studies.
Acupuncture: I hereby request and consent to the performance of acupuncture treatments and other procedures within the scope of the practice of acupuncture on me (or on the patient named for whom I am legally responsible) by the Doctor.
POSSIBLE RISKS IN CHIROPRACTIC ADJUSTMENT As with any healthcare procedure, there are certain complications which may arise during chiropractic manipulation and therapy. These complications include but are not limited to: fractures, disc injuries, dislocations, muscle strain, cervical myelopathy, costovertebral strains and separations, and burns. Some types of manipulation of the neck have been associated with injuries to the arteries in the neck leading to or contributing to serious complications including stroke. Some patients will feel some stiffness and soreness following the first few days of treatment. The Doctor will make every reasonable effort during the examination to screen for contraindications to care. However, if you have a condition that would otherwise not come to the Doctor's attention, it is your responsibility to inform the Doctor.
THE PROBABILITY OF THOSE RISKS OCCURRING
Fractures are rare occurrences and generally result from some underlying weakness of the bone which we check for during the taking of your history and during examination and X-ray. Stroke and/or arterial dissection caused by chiropractic manipulation of the neck has been the subject of ongoing medical research and debate. The most current research on the topic is inconclusive as to a specific incident of this complication occurring. If there is a causal relationship at all, it is extremely rare and remote. Unfortunately, there is no recognized screening procedure to identify patients with neck pain who are at risk of arterial stroke.
THE RISKS AND DANGERS OF REMAINING UNTREATED
Remaining untreated may allow the formation of adhesions and reduce mobility which may set up a pain reaction further reducing mobility. Over time this process may complicate treatment making it more difficult and less effective the longer it is postponed.
POSSIBLE RISKS IN ACUPUNCTURE TREATMENT I appreciate that it is not possible to consider every possible complication to care. I have been informed that acupuncture is a generally safe method of treatment, but, as with all types of healthcare interventions, there are some risks to care, including, but not limited to: bruising; numbness or tingling near the needling sites that may last a few days; and dizziness or fainting. Burns and/or scarring are a potential risk of moxibustion. Unusual risks of acupuncture include nerve damage and organ puncture, including lung puncture (pneumothorax). Infection is another possible risk, although the clinic uses sterile disposable needles and maintains a clear and safe environment.
PATIENT PLEASE REVIEW, PRINT & SIGN NAME
I have read or have had read to me the above explanation of the chiropractic adjustment and related treatment, including acupuncture. I have discussed it with the Doctor and have had my questions answered to my satisfaction. By signing below, I state that I have weighed the risks involved in undergoing treatment and have decided that it is in my best interest to undergo the treatment recommended. Having been informed of the risks, I hereby give my consent to that treatment.
